

CARE & MAINTENANCE OF WICANDERS FLOORS

WICANDERS floors are easy to maintain. You only need a mild detergent and a vacuum cleaner. For daily/weekly maintenance, you can also use a broom handle with a cloth on the end. The removable cloth has a substance with anti-static characteristics, which will clean all the dust and prevent its settling on the floor.

For care and maintenance, Wicanders recommends a range of products which will give pleasant results.

Product	Function	Finish	Dilution	Drying Time	Coverage
Power Polish	Protecting	Corkcomfort Floating WRT & HPS	None	30-45 min.	3 litres/100 m ² (1 litre/30m ²)
Soft Cleaner	Mild Detergent	Corkcomfort Glue down WRT & HPS Woodcomfort Floating HPS	With water 1:50-1:200	15 min.	100-200 ml / 100 m ²
Spray Cleaner	Mild detergent (spray)	Woodcomfort Glue down HPS Artcomfort Floating WRT & HPS	None	Immediately	N/A
Power Strip*	Removing Power Polish Thorough cleaning	Corkcomfort FastConnect PU Finished Vinylcomfort Floating UV Acrylic & UV Ceramic Vinylcomfort Glue down UV Ceramic	With water 1:20	5 min.	1 litre/100 m ²

*Use only in case the floor is too dirty and use it always diluted.

For a correct use follow very carefully the application instructions of the products on the packaging labels, as well as the information from technical data sheets.

If you prefer to use other maintenance products, which are not Wicanders, please use only the ones that Wicanders recommends (see table Auxiliary Product Selector).
